INDEX—VOL. IX.

☞ A star (*) denotes illustrated articles.

A

Answers to Correspondents, 24, 40, 56, 72, 87, 104, 120, 136, 152, 168, 184, 200, 216, 232, 247, 264, 280, 296, 312, 327, 344, 359.
Auriferous sulphurets, chlorination of 37
Annihilator, fire 48.
*Ashcroft's steam pressure gunge, 49.
Acetylene—curious experiments, 51.
Advertising agencies, 57.
Avitor or flying machine, 64.
Artificial light, the cost of 68.
Advertisements, classified index to 73.
A California invention, 85.
Air-gas, or hydrocarbonized air, 88.
American Institute, 89.
About advertising, 89.
A new cement, 101.
"A good time coming," 101.
Auction sale of coal, 102.
American Institute, fair of the 104.
American steel, 112.
American Inst. Fair, closing of the 133
" " " 136
*Adjustable gas main, Floyd's 145
Artificial light—the world after sunset, 122
American tube well, 117
A gigantic casting, 163
American Institute, 166
A new theory of the gulf stream, 166
A spicy letter, 180
*A. L. Bogart's gas stoves, 192
A California invention, 85, 197
A Cork gasometer, 213
Almost fabulous luck, 224
A boiling lake, 225
*Adjustable tar valve, J. A. Sabbaton's, 225
A remarkable gas well, 320
Absorption of light by different bodies, 321
A wonder of nature, 338
A tour through the West, 355
Air-light, new 376
Advertisement, new 376
Another water enterprise in San Francisco, 197

B

Brevities, 8, 32, 35, 68, 116, 130, 162, 179, 213, 366, 372.
Blast furnace gas, utilization of 50
Business, a good 73
Bridging the British channel, 100
Borax plenty, 112
Bronzed cast iron, works in 100
Babcock & Wilcox steam engine, 113, 120
Boats of paper mache, 133
*Brick machine, the Eureka 144
Bricks, coal 148
*Bailey's patent steam engine, 207
Bursting of a reservoir at Preston, 213
*Burner, the Solar 240
*Burner, the Standard 288
Building purposes, paper for 288
*Butler's rosin-gas apparatus, 305
Bi-sulphide of carbon, Versmann's report on 321
Bowditch's system of purification, 324
Bronze aluminium, 338
*Beardsley's gas prover, 353
*Binder, Conant's 357
*Burner, Osborn's lamp 367
*Burner, Clipper 368
Brilliant invention for blinding burglars, 370

C

Coal-gas, on the analysis of 8
Chicago tunnel accident, 5
Conduction of sound by hydrogen and air, 17
Carbonic oxide, 21
Combustion, the economy of 24
Concrete fuel, 33
Coal market, 37, 53
Carbolic acid, 53
Croton aqueduct, 53
Coal gas, 116
Condenser, the 121
Cast steel, quickened production of 133
Concerning gas, 133
Copper, new discoveries of 133
Chemical force and electricity, new theory of 136
*Cornell & Pease's steam pump, 146
Converting steel, necessity for further methods of, 148
Cathedral of Seville, Spain, 149
Calcutta, sunrise in 149
Charcoal, oxydation by 149
Carbonic acid baths, 149
Counterweighting gasometers, 153
Chloride of magnesium, 164
Crystallized eggs, 168
Cameron coal, 168
Coal and petroleum, formation and deposit of 179
Coke making, economy in 179
Commendatory, 180
Corrosion of boilers, 180
Copper, coating iron or steel with 194
Chicago tunnel, 197
*Collins' patent lamp, 208
Carriage, a sailing 213
Composition of tea, 224
City of London, quality of the gas supplied to the 243
Croton aqueduct department, 244
*Cutting and punching machines, 257
Coal-gas, the aesthetics of 258
Cheap gas, Trinidad bitumen and, 259
Cast iron, porosity of 273, 309
Clay retorts, 276
Condenser, the immersed multitubular, 290
Condensation, 292
Clay and iron retorts, 306
Compressed air power distributed like gas 309
Coal-gas as a source of ammoniacal contamination, 320
Coal-gas and hydrocarbon gas, 343
Condensation waters of coal-gas, treatment of the 356, 370
California petroleum, 375
Country residences, 376
Chemical action of light, 376

D

Diamonds, 2
Destruction of gas-pipes by rats, 20
Death of John K. Brick, Esq., 57
Death of Professor Faraday, 69
*Davis' patent superheating boiler, 97
Departure of the swallow, 149
Drawing and charging gas retorts, a new machine for 177
Diamond mine in California, 197
Diffusion, 292
Despard coal company, 375
Drummond light, the so-called 372

E

Electricity applied to iron smelting, 4
Erie Basin iron works, 8
*Eddy's improved oil stoves, 17
Expense of running peat works, 18
English gas coals, 37
Effect of the atmosphere on coal, 68
Elizabeth gas works, 89
Electric telegraph, velocity of signals by 102
Enterprise east and west, 137
*Empire shingle machine, 176
Evolution of gas from coffee, 178
Electric light, cause of the intensity of the 293
Extraordinary phenomenon witnessed at sea, 309
Errata, 201, 376
*Etna gas stoves, 64
*Edson lathe and planer tool, 320

F

From Terre Haute, 5
Fire annihilator, 48
Flame, Dr. Frankland's theory of luminosity in 73
Fire extingnisher in California, 89
Fire extinguisher, new 89
" " 118
Frozen well of Vermont, 181
Furnaces, temperature of 322
Flames, on musical and sensitive 307
Failure of the magnesium light, 276

G

*Gas cooking stoves, Dr. Musgrave's 1
Gases, absorption of, by metals, 1
Gas cooking stoves—a new thing under the sun, 4
Gas coals, Scotch 4
Gas and oil, manufacturing illuminating 5
Gas-light perfecter, platinum 5
Gas question in Cincinnati, 8
Gas and petroleum springs, peat among the 21
Gas boiler, Shrewsbury's nonpareil 34
Gas in British towns, prices and quality of 34
Gas meters at the Paris Exposition, 34
Gas, chemistry as applied to the manufacture of 36, 51, 66, 83, 99.
Gas works, 36
Gas compared with coal for cooking, 37
Gas question in Cincinnati, 40, 73
Gas cannel and coals, 50
Gas machines and gasoline, 52
Gas works, Brooklyn 56
Gas, peat for 64
Gas in Japan, 67
Gas question in London, 69
Gas in New York and vicinity, 72
Gas, hydrogen, etc. 73
*Gas machine, the Solar 81
Gas in New York—correction, 99
Gas company, new, in Memphis, 90
Gas, ode to 101
Gas in Knoxville, Tenn. 104
Gas, advantages of 115, 130, 147
Gas, concerning 133
Gasometers, new feature in 137, 148
Gas works in the U. S. Court, 137
Gas works for sale, 137
Gas, history of illuminating 147, 163
Gas men, important to 148
Gas coal, the new 152
Gas engineers, proposed Convention of 153, 180, 200, 229, 260, 324, 327, 344, 372.
Gas works and apparatus for sale, 153
Gas, purification of 162, 178, 184, 210, 227, 244, 275.
Gas pipes, machine for proving 164
*Gas chandeliers, Bliss' improved attachment for 177
Gas mains, scale in 180
Gas, facts for the people about 184
Gasholder houses, 185
Gas works, practical management of 196, 212, 228, 242, 259, 274, 290.
Gas, carburetted 197
Gas fitters and consumers, hints to 200
Gas works, items about 201
Gas company, San Jose 213
Gas company, Liverpool 213
Gas-lighter, 213
Gas and air purifier, 213
Gaylord's Great Western Pipe Foundry, 217
Gas from "Lightwood" 226
Gas in Paris, 228
Gas, employment of hydrogen 228
*Gas works, private 241
Gas engine, the Hugon 246
Gas controller, Thompson's 256
Gas-light, smoke from 262
Gas-lighting, Smedberg's Synopsis of 262, 276, 293, 224
*Gas machine, Springfield 272
*Gas machine, Rand's pneumatic 273
Gas works, report on materials and apparatus for 277, 292
*Gas works, portable 289
Gas ventilation, 290
Gas, effect of pressure on the consumption of 291
Gas works, Kansas City 293
Gas vs. oil—dangerous illuminators. 296
Gas lime as a manure, 307
Gas-proof cement for laboratories, 307
Gas works, report on the Virginia City 308
Glass, ornamental 309
Ghastly poetry, 310
Glycerine, 310
Gas meters, application of glycerin to 210
Gas question, Cincinnati 312, 323, 337.
Gas well, a remarkable 320
Gas, on the relation between the specific gravity and pressure of 281
Gases, specific heat of 322
Gas meter, new 338
Gas, a bottle to contain liquefied 340
Gas works, the New Albany 349
Gas, steam raised by 340
Gases, molecular mobility of 341
Gas meter, the A.B.C 368

Gas, generating steam by 371
Gas in Buenos Ayres, S. A. 361
Gas works, fire at the Washington 371
Gas works, large 375
Gas works, small 376
Gold mines in Brazil, 21
Gaylord's patent coupling, 33
Gauging petroleum, new apparatus for 387
Gas question, the Adrian 353

H

*Hotchkiss' patent forge hammer, 65
Hydrogen gas, etc., 73
How to use peat, 80
Hydraulic propulsion, 112
High pressure engine, 164
Hardening steel, 169
How to prevent gas meters from freezing, 185
How chromos are made, 211
Heating railroad cars, 213
How to deal with "Greek fire," 228
Hugon gas-engine, 246

I

Improved motive powers, 100
Important invention, 121
Indestructible railway sleepers, 146
Instantaneous lighting, 149
Improved kaleidoscopes, 194
Improvement in packing cases, 213
Incidental items, 297, 313, 327, 344, 360
Improved duplex treadle for sewing machines, 308
*Isbell's patent vibrating piston engine, 383.

J

Jets of naphtha, 259

L

La Clede fire brick works, 9
Lime in water purification, 32
Life saving mattress, 65
Lead, separation of silver from 113
London supply of water, 138
London gas companies, 149
Levy's fire annihilators on railroads, 178
Late mining news, 182, 198, 214, 214, 230, 246, 272.
London tunnel not unhealthy, 196
Lighting gas by electricity, 213
Laming's process of purification, 210
Lamplighters superseded, 370
Lamplighting by clockwork, 372
Long's hot blast oven, 376

M

Mining share market, 6, 22, 38, 50, 86, 150, 166.
McGeary's carburator, 9
Miscellaneous items, 16, 20, 48, 57, 70, 99, 208, 224, 240, 256
*Miner's patent street lamp, 17
Magnesium mine, 67
Miniature volcano, 72
Manufacture of steel, 83
Mineral wealth of the United States, 98
Metallurgical miracle, 149
Mercantile library, 160
Mineral paint, 178
More water for San Francisco, 195, 211
McHenry & Carson's gas fixture, lamp, and plumbers' depot. 229
Magnetic phantoms, 285
Miscellanea, 304, 351, 367.
Meter rents, new law prohibiting 355

N

*Nassau Gas Company's improved generator, 320
Naphtha in the Caucasus, 367
Nassau water-works, Brooklyn, 114.
New method for the preparation of oxygen, 20
New process for preparing tin plates, 35
New roasting furnace, 37
New gas works in Cleveland, 88
New safety lamp, 101
New cement, 101
New explosive compound, 101
*New oil stove, 128
New process for reducing ores, 130
New electro-magnetic light, 131
New use for petroleum, 133
New water main, 133
Newgasstove, furnace, etc., 137
New apparatus for illustrating wave motion, 164
New blasting powder, 165
New motive power, 178
New gas-light, 243
New pumping engine for the Brooklyn water-warks, 308
New, wonderful and practical, 322
New apparatus for burning petroleum, 325
Nitro-glycerine—its composition, 324
New advertisements, 376
New books, 376

O

Our Journal, 8
On the application of liquid hydrocarbons as a substitute for cannel, in the manufacture of gas of high illuminating power, 35
Obituary, 40
On the absorption and dialytic separation of gases by colloid septa, 69
On naphtha and illuminating oil from heavy California tar, 339
On the mode of working retorts, 339
On the water supply of London, 354

P

Progress of Science, 2
Patent Claims, 6 to 357.
Pneumatic despatch line in Paris, 8
Peat fuel for domestic purposes, 32
Proportions of the human figure, 35
Purification of water, 36
Petroleum fuel for steam boilers, 41
Pantelegraph, the 49
Petroleum as fuel at the Brooklyn Navy Yard, 68
Petroleum and freezing water, 81
Petroleum trade in Europe, 100
Pneumatic railway, 101
Petroleum exported from Philadelphia & New York, 115
Petroleum fuel for a dummy locomotive, 132
Phila. public park and water supply, 133
Panama railroad, 149
Pithole oil fields, 164
Purification of water, 164
Proposed railway across Nicaragua, 178
Pleasures of reading, 194
People's gas company, 195
Petroleum vs. coal, 197
Pancras station of the Imperial gas compnny, of London, 216
Petroleum trade at Pittsburgh, 225
Petroleum for steamship boilers, 241
Plumbago crucibles, 244
Plumbago mines of Canada, 310
*Patent lamps, 336
Purification of gas by a prepared iron ore, 340
Preparation of whitewash, 341

R

Recent inventions, 21
Russia sheet iron, 85
Report of committee on plastic slate, 165
Raising a water main, 352
Rand's pneumatic gas machine, 273, 309

S

Separating nitric from sulphuric acid, 4
Smelt your own copper ores, 18
Study on coal tars and their products, 52 to 117.
*Stewart's patent perforated wrought iron tile, 80
Sunlight in the mines, 84
Stations on the Union Pacific R. R., 85
Stimpson's pens, 105
Spontaneous combustion, 127
*Stanley's hydraulic main, 129, 161
Sensitive flames, 130
Source of salt in the sea, 107, 132
Steel from pig iron, 225
Sabbaton's patent screening shovel, 304
Statistics of magnesium, 383

T

The Lamb knitting machine, 16
Titaniferous sand, 131
The Seirra tunneled, 164
To our readers, 184
The Suez canal, 323
Telescope for examining objects under water, 213

U

Useful recipes, 102 to 198.
Underground telegraphic system, 128
Use of the lime-light in barracks, 308
Use of refuse, 371

V

Valve gear for pumps, 368

W

Water supply of our great cities, 2, 18, 34.
Water supply for Valparaiso, 10
Wilde's electric light, 20
Water supply of London, 84
What is petroleum? 96
Wages of miners in England, 101
Water supply for London, 128
Water rates, the Jersey City 213
Water pipe extension, 245
Water works, Detroit 261
Wonder of nature, 338
Water, impurities in 341
Water as a source of heat, light and motion, 327
